IERB TRACK SHEET - PROJECT PROGRESS REPORT

PRISM Verified Historical Project

Snapshot: 2026-10-28 08:16:52.920206 (Asia/Manila)

Research Identification

Research information	Recorded value
Principal Investigator	Not recorded
Protocol Code	Not recorded
Research Category	Not recorded
Research / Study Title	PRISM Verified Historical Project
Co-Investigators	Not recorded
Research Group Identifier	prism-verified-historical-project
Academic Year	2026-2027
Assigned Research Adviser	Synthetic Adviser 2
Current IERB Stage	IERB Completed

Initial Submission and Resubmission Tracking

Submission	Date Submitted	Date Returned
Initial Submission	2026-10-28 08:15:26	2026-10-28 08:15:37
1st Resubmission	2026-10-28 08:15:37	2026-10-28 08:15:47
2nd Resubmission	2026-10-28 08:15:47	2026-10-28 08:15:49
3rd Resubmission	2026-10-28 08:15:49	2026-10-28 08:15:51

44 formal-submission audits lack complete source document evidence. Dates cannot be reconstructed from those records. Audit IDs retained for RPMS review: 56, 60, 92, 104, 113, 122, 131, 186, 190, 221, 226, 233, 240, 245, 250, 255, 260, 265, 270, 275, 280, 285, 296, 316, 324, 338, 343, 357, 363, 377, 386, 394, 423, 505, 513, 528, 543, 558, 578, 591, 605, 620, 634, 650.

RPMS REVIEW REQUIRED: 6 official correction resubmission cycles exceed the three report slots. All overflow evidence is retained in the report snapshot; no additional tracking rows are generated.

1st Resubmission - Correction details

Case #12; requested: 2026-10-28 08:15:37.584005; Amendment required: No; resolved: 2026-10-28 08:15:38.518148

Return / correction reason: Synthetic RPMS correction case

Affected categories: Study Protocol

Interrupted review: Initial Submission

2nd Resubmission - Correction details

Case #13; requested: 2026-10-28 08:15:46.772855; Amendment required: No; resolved: 2026-10-28 08:15:48.243024

Return / correction reason: Synthetic RPMS correction case

Affected categories: Study Protocol

Interrupted review: Approval of Data Gathering

3rd Resubmission - Correction details

Case #14; requested: 2026-10-28 08:15:48.785071; Amendment required: Yes; resolved: 2026-10-28 08:15:50.835552

Return / correction reason: Synthetic RPMS correction case

Affected categories: Study Protocol

Interrupted review: Approval of Data Gathering

Document Requirement Status

Requirement	Recorded state
Certification of Ethics	Accepted
Curriculum Vitae	Accepted
Data Collection Questionnaire	Accepted
Diagrammatic Workflow	Accepted
Form 11 Review Checklist	Accepted
Form 12 Registration and Application Form	Accepted
Form 13 Study Protocol Assessment Form	Accepted
Form 14 Informed Consent Assessment Form	Accepted
Informed Consent in English	Accepted
Informed Consent in Local Language	Accepted
Letter to IERB Chair	Accepted
Payment Receipt	Accepted
Study Protocol	Accepted
Form 33 - Certificate of Approval	Accepted
Form 33-0B - Final Report Form	Formally Submitted to RPMS

Current IERB Progress

Official stage: IERB Completed | Progress: 100%

Accepted mandatory documents: 14 / 14. The Final Report requires formal submission, with no additional RPMS acceptance.

Missing / pending: None recorded

Correction status: No open correction case

Latest recorded activity: 2026-10-28 08:16:52.342926

Form 33 acceptance: Accepted

Form 33-0B formal submission: Recorded (automatic completion)

IERB completion date: 2026-10-28 08:16:37.948909

AI Progress Assessment (generated review aid)

Local deterministic fallback

Recorded stage: IERB Completed. Official progress: 100%. 14 requirement(s) currently have verified RPMS acceptance; 6 correction case(s) have formal resubmission evidence. The project has a recorded official completion. Review the requirement table for documented outstanding actions. Missing dates and investigator roles cannot be inferred. No cause of delay or future outcome is established.

Source / Verification Notes

44 formal-submission audits lack complete source document evidence. Dates cannot be reconstructed from those records. Audit IDs retained for RPMS review: 56, 60, 92, 104, 113, 122, 131, 186, 190, 221, 226, 233, 240, 245, 250, 255, 260, 265, 270, 275, 280, 285, 296, 316, 324, 338, 343, 357, 363, 377, 386, 394, 423, 505, 513, 528, 543, 558, 578, 591, 605, 620, 634, 650.

RPMS REVIEW REQUIRED: 6 official correction resubmission cycles exceed the three report slots. All overflow evidence is retained in the report snapshot; no additional tracking rows are generated.

Investigator roles and research category have no authoritative fields in the current canonical project schema. Submission holder and membership do not establish investigator roles.

Protocol code comes from the designated holder; academic year requires agreement among recorded project members.

Submitted dates use document rpms_submitted_at with mandatory formal-submission audits; returned dates use separate document_returned_for_revision audits. Uploads, acceptances and case openings do not establish those dates.

Each case contributes at most one cycle. Date Submitted is the earliest audited formal submission of an affected successor or required Amendment in that case, not proof that every correction was submitted.

All times are stored database values shown in Asia/Manila. Unknown dates remain Not recorded.

The shared PDF engine uses built-in Latin fonts and transliterates unsupported characters. The retained database snapshot preserves the original UTF-8 source values.

Factual tables are database-derived. Generated narrative is an interpretation for review and does not constitute an institutional decision. Verify against retained source evidence.
