## Summary (generated review aid)

This descriptive quantitative study examined 40 fictional research transactions. Average retrieval time was 12 minutes manually and 4 minutes with centralized retrieval. The findings describe this synthetic sample only; the small sample and absence of randomization limit generalization.

## Source and verification notes

Generated review aid; verify every statement against the original document. Extraction does not prove institutional approval or requirement acceptance. Scanned images, figures and complex table structure may not be extractable.

Human verification required. Generated interpretations do not establish ethics approval, research findings or official progress.
